## TDWG Standards

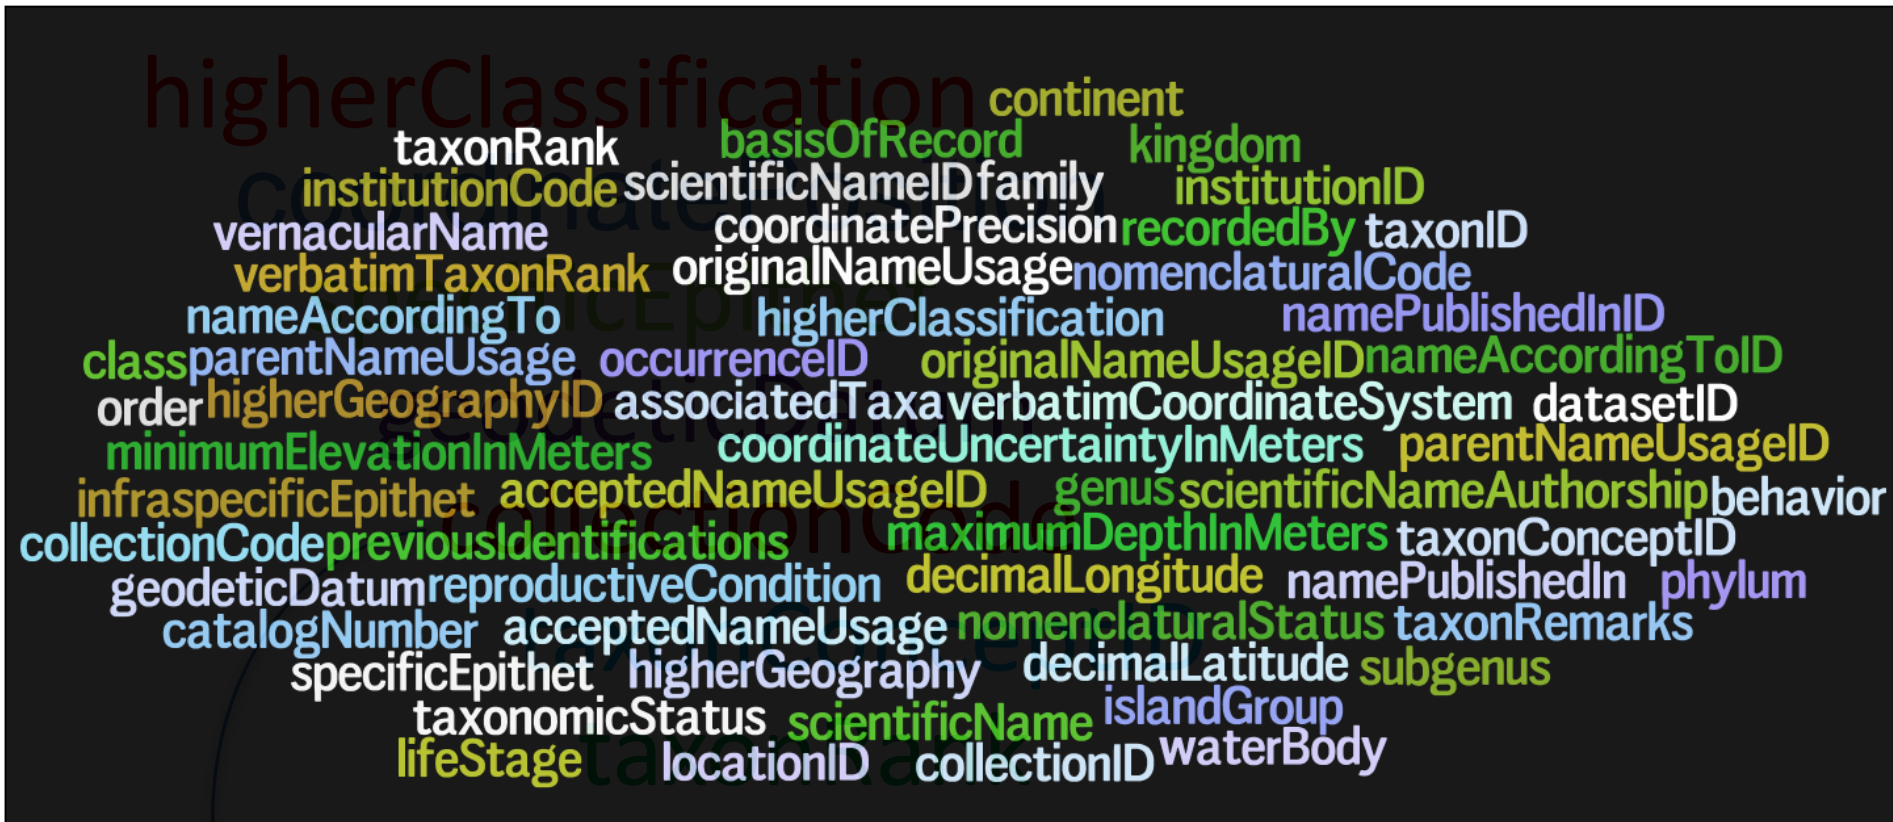

TDWG's standards are listed below. For information about current work within TDWG, we would suggest that you look at the [TDWG Wiki](#). For further information, please [contact us](#).

Title	Activity (Task or Interest Group)	Category	Status	Date Published
Audubon Core Multimedia Resources Metadata Schema	Multimedia Resources Task Group	Technical Specification	Current	28-Oct-2013
GUID and Life Sciences Identifiers Applicability Statements		Applicability Statements	Current	30-Jan-2011
Darwin Core	DarwinCore Task Group (DWC)	Technical Specification	Current	09-Oct-2009
TAPIR - TDWG Access Protocol for Information Retrieval	TAPIR Task Group	Technical Specification	Current	09-Sep-2009
Access to Biological Collection Data - version 2.06	Access to Biological Collections Data	Technical Specification	Current (2005)	16-Sep-2005
Structured Descriptive Data	Biological Descriptions Interest Group	Technical Specification	Current (2005)	16-Sep-2005
Taxonomic Concept Transfer Schema	Taxonomic Names and Concepts Interest Group	Technical Specification	Current (2005)	16-Sep-2005
Definition of the Delta Format		Technical Specification	Current (2005)	01-Oct-1986
TDWG Standards Documentation Specification	TDWG Infrastructure Project	Technical Specification	Draft	
Natural Collections Descriptions (NCD): A data standard for exchanging data describing natural history collections	Natural Collections Descriptions Interest Group	Technical Specification	Draft	
ABCDDNA - DNA extension for Access to Biological Collection Data	Access to Biological Collections Data	Technical Specification	Draft	
HISPID3 - Herbarium Information Standards and Protocols for Interchange of Data	Observation and Specimen Records	Technical Specification	Prior	01-Oct-1996
Economic Botany Data Collection Standard	Economic Botany Interest Group	Best Current Practice	Prior	01-Oct-1995
Plant Occurrence and Status Scheme		Status and Categories	Prior	01-Oct-1995
Plant Names in Botanical Databases		Best Current Practice	Prior	01-Oct-1995
Authors of Plant Names		Status and Categories	Prior	01-Oct-1992
World Geographical Scheme for Recording Plant Distributions		Status and Categories	Prior	01-Oct-1992

## Darwin Core Terms: A quick reference guide

**Title:** Darwin Core Terms: A quick reference guide

**Date Issued:** 2009-02-12

**Date Modified:** 2015-06-02

**Abstract:** This document is a quick reference for all recommended Darwin Core terms. For complete historical term information, including version changes and pre-standard terms, see [\[HISTORY\]](#). For a comparative table of elements from pre-standard versions of Darwin Core to the current terms in the standard, see [\[VERSIONS\]](#).

**Contributors:** John Wieczorek (MVZ), Markus Döring (GBIF), Renato De Giovanni (CRIA), Tim Robertson (GBIF), Dave Vieglais (KUNHM)

**Legal:** This document is governed by the standard legal, copyright, licensing provisions and disclaimers issued by the Taxonomic Databases Working Group.

**Part of TDWG Standard:** <http://www.tdwg.org/standards/450/>

### Occurrence

[occurrenceID](#) | [catalogNumber](#) | [recordNumber](#) | [recordedBy](#) | [individualCount](#) | [organismQuantity](#) | [organismQuantityType](#) | [sex](#) | [lifeStage](#) | [reproductiveCondition](#) | [behavioralObservations](#) | [preparations](#) | [disposition](#) | [associatedMedia](#) | [associatedReferences](#) | [associatedSequences](#) | [associatedTaxa](#) | [otherCatalogNumbers](#) | [occurrenceRemarks](#)

### Organism

[organismID](#) | [organismName](#) | [organismScope](#) | [associatedOccurrences](#) | [associatedOrganisms](#) | [previousIdentifications](#) | [organismRemarks](#)

### MaterialSample | LivingSpecimen | PreservedSpecimen | FossilSpecimen

# Biodiversity Data Standards: DwC-A

A DwC Archive is a compressed file containing a minimum of three files.

1. A data file (occurrence.txt) conforming to the SIMPLEDWC in a CSV format where the first row includes Darwin Core standard term names.
2. A meta file (meta.xml) in XML format containing technical details to instruct a computer in how to use the data file.
3. A meta file (eml.xml) in an XML format containing explanatory details about the records contained within the data file to instruct a user if the data will be fit for their use.

DwC Archives are becoming the preferred method for sharing biodiversity occurrence data.

## Audubon Media Description

<http://rs.tdwg.org/ac/terms/Multimedia>

The Audubon Core is a set of vocabularies designed to represent metadata for biodiversity multimedia resources and collections. These vocabularies aim to represent information that will help to determine whether a particular resource or collection will be fit for some particular biodiversity science application before acquiring the media. Among others, the vocabularies address such concerns as the management of the media and collections, descriptions of their content, their taxonomic, geographic, and temporal coverage, and the appropriate ways to retrieve, attribute and reproduce them.

[back](#) [download](#)

## Properties

[Management Vocabulary](#) [Attribution Vocabulary](#) [Agents Vocabulary](#) [Content Coverage Vocabulary](#) [Taxonomic Coverage Vocabulary](#) [Resource Creation Vocabulary](#) [Related Resources](#)

## Management Vocabulary

**identifier** An arbitrary code that is unique for the resource, vocabulary, or collection. See also [http://terms.tdwg.org/wiki/Audubon\\_Core\\_Term\\_List](http://terms.tdwg.org/wiki/Audubon_Core_Term_List)

*Examples:* "http://www.morphbank.net/840303"

Qualified Name <http://purl.org/dc/terms/identifier>  
Namespace <http://purl.org/dc/terms/>  
Group Management Vocabulary  
Data Type string  
Required true

**type** dc:type may take as value any type term from the MovingImage, InteractiveResource, Text. Values from <http://purl.org/dc/dcmitype/StillImage>) from a controlled vocabulary and use dcterms:type when you can supply the URI. One of dc:type and dcterms:type must be supplied. Values of each should designate the same type, but they can be different. See also [http://terms.tdwg.org/wiki/Audubon\\_Core\\_Term\\_List](http://terms.tdwg.org/wiki/Audubon_Core_Term_List)

*Examples:* "Image", "MovingImage", "Sound"

Qualified Name <http://purl.org/dc/elements/1.1/type>

## Darwin Core Measurement Or Facts

dc:MeasurementOrFact

Support for generic measurements or facts as defined in Darwin Core.

Link: <http://rs.tdwg.org/dwc/terms/index.htm#measureindex>

[back](#) [download](#)

## Properties

**measurementID** An identifier for the MeasurementOrFact (information pertaining to measurements, facts, characteristics, or assertions). May be a global unique identifier or an identifier specific to the data set. See also <http://rs.tdwg.org/dwc/terms/index.htm#measurementID>

*Examples:*

Qualified Name <http://rs.tdwg.org/dwc/terms/measurementID>  
Namespace <http://rs.tdwg.org/dwc/terms/>  
Data Type string  
Required false

**measurementType** The nature of the measurement, fact, characteristic, or assertion. Recommended best practice is to use a controlled vocabulary. See also <http://rs.tdwg.org/dwc/terms/index.htm#measurementType>

*Examples:* "tail length", "temperature", "trap line length", "survey area", "trap type"

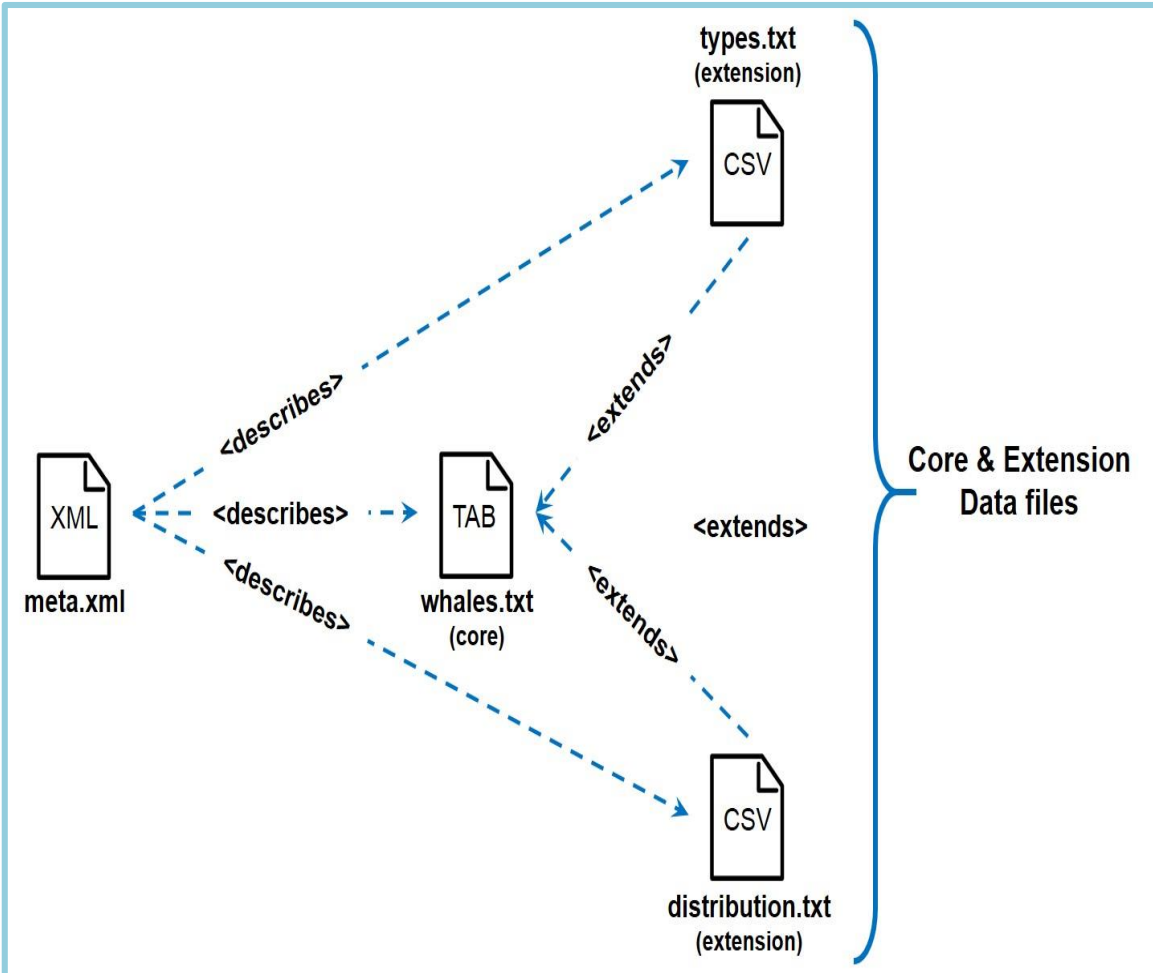

Qualified Name <http://rs.tdwg.org/dwc/terms/measurementType>  
Namespace <http://rs.tdwg.org/dwc/terms/>  
Data Type string  
Required false

**measurementValue** The value of the measurement, fact, characteristic, or assertion. See also <http://rs.tdwg.org/dwc/terms/index.htm#measurementAccuracy>

*Examples:* "45", "20", "1", "14.5", "UV-light"

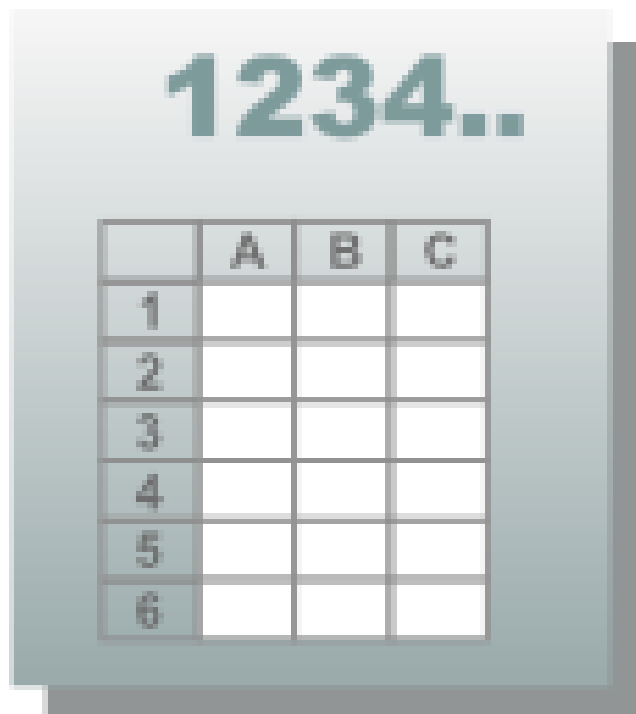

Qualified Name <http://rs.tdwg.org/dwc/terms/measurementValue>  
Namespace <http://rs.tdwg.org/dwc/terms/>  
Data Type string  
Required false
