

# Ichthyology collection digitization

University of Kansas  
1886

Local Name: Yellow Perch at Harborside, Kan., U.S.A.  
Date: 14 July 1886

Name: \_\_\_\_\_

Collector: Moore, Lawrence, et al. Field No. 1171 Altitude \_\_\_\_\_

Number of specimens: 2 Sexes \_\_\_\_\_ Age \_\_\_\_\_

Specimens by: F. J. Dyer Labelled on \_\_\_\_\_

Number of \_\_\_\_\_

Number of \_\_\_\_\_

UNIVERSITY OF KANSAS MUSEUM OF NATURAL HISTORY

CATALOGUE OF SPECIMENS

No.	Species	Locality	Date	Collector	Sex	Age	Remarks
1	<i>Perca flavescens</i>	Harborside, Kan., U.S.A.	July 14, 1886	Moore, Lawrence, et al.	♂	Immature	
2	<i>Perca flavescens</i>	Harborside, Kan., U.S.A.	July 14, 1886	Moore, Lawrence, et al.	♀	Immature	

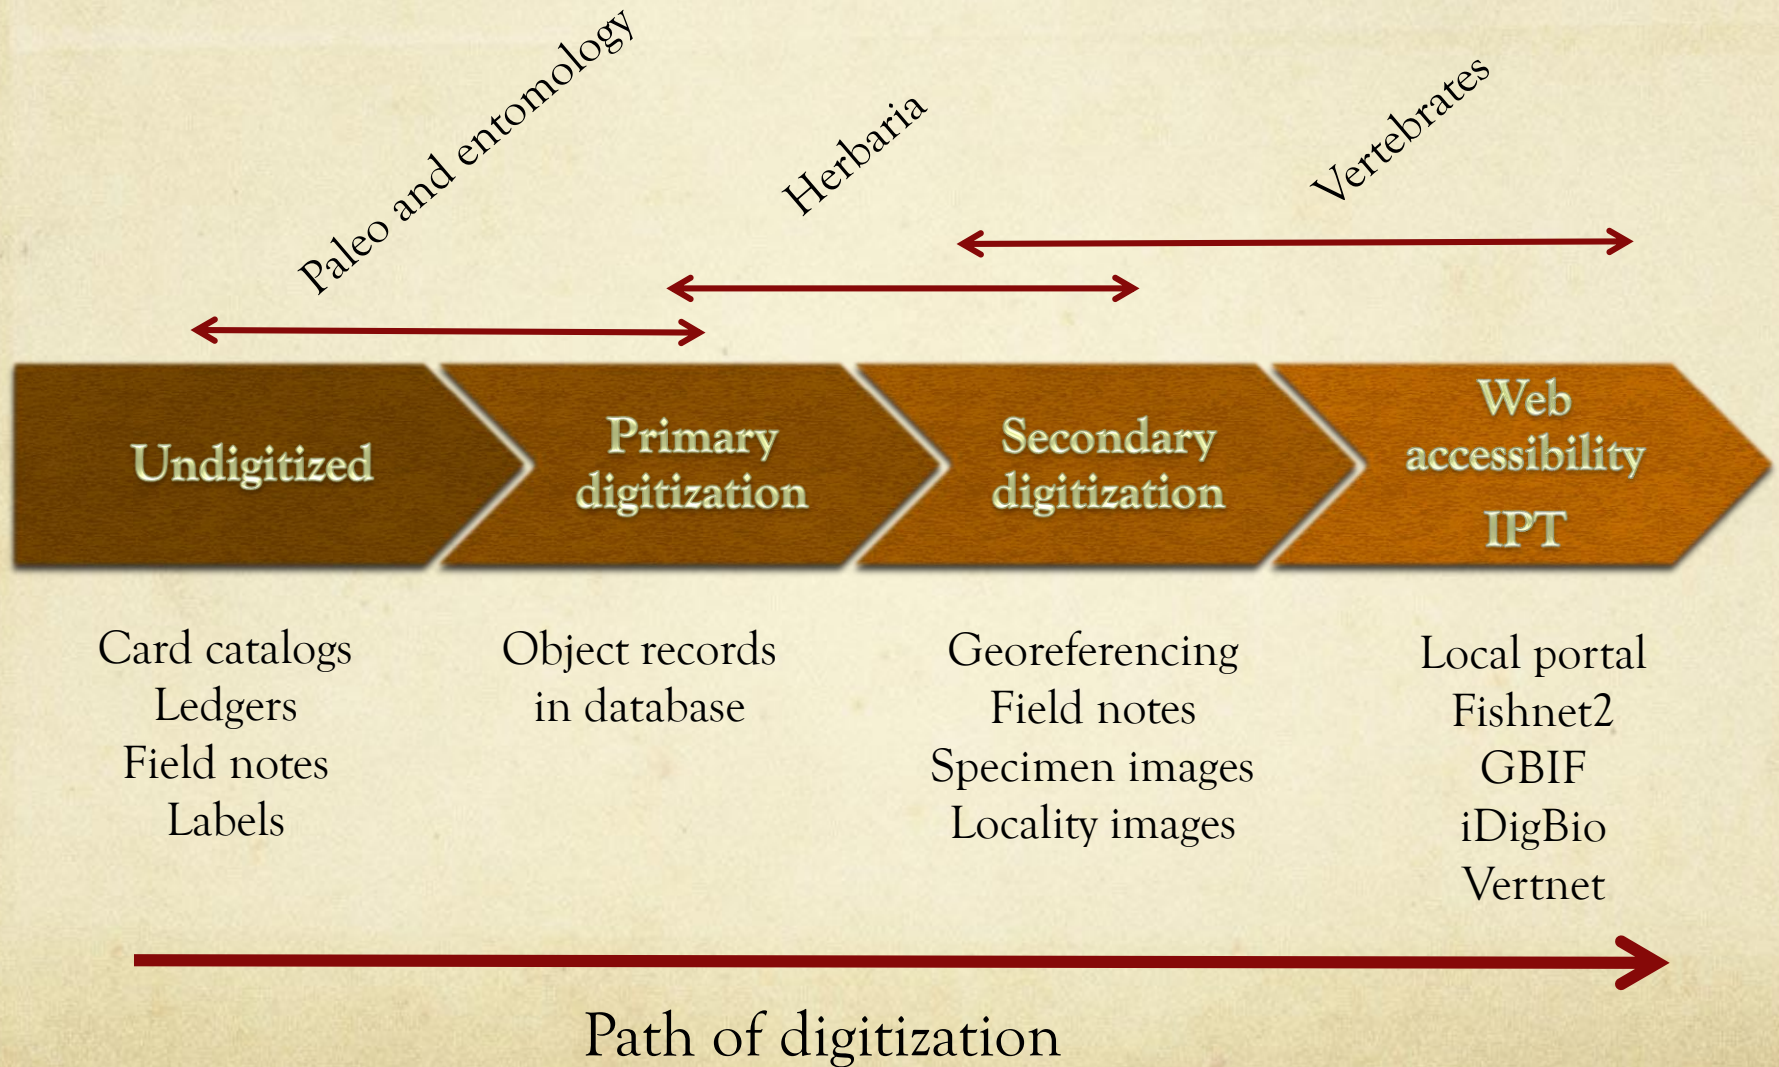

# Vertebrate/Ichthyology advantages in digitization

- Collections relatively small
- Good historical practices of use of ledgers, card catalogs, field notes
- Early adopters of digitization
- Ichthyology - use of lots rather than individual specimens

# Digitization progression

# Digitization steps

- Primary digitization – primary data to create specimen records
  - Ledger
  - Card catalog
  - Labels
  - Field notes
- Secondary digitization – augmentation of specimen data with additional information from digitized content
  - Field notes
  - Specimen images (35mm slides and digital), X-Rays
  - Locality images
  - Other media – video, audio
  - PDFs of reference works

# Primary digitization

5082

MJ61-94-15 Date: 1 Oct 1994  
 Collectors: M.J. Ghedotti, K.A. Shaw, C.A. Annett,  
 M.J. Grose, C. Fielitz, J.R. Wolfe, L.N. Boyerstock,  
 J. Hunt

USA: Arkansas: Newton Co., Thomas Cr. at the  
 Thomas Cr. bed + breakfast <sup>NE 1/4</sup> sec. 32 T44N R22W  
 Drainage: White R. Time: 2:30-4:00 AM  
 Temp: ?

Turbidity: low Substrate: pool-gravel, sand,  
 detritus; stream-gravel + lg rock slabs  
 Cover: little in pool; rock slabs + brush in small "stream"  
 Depth: sampled to approx. 3.5'  
 Gear: 8'x15' flat seines + electroshocker

Species:

# 2635-51; 2641-40; 2702	<i>Compostoma oligolepis</i>	139 (100%)
# 2577-2581; 2601-311	<i>Luxilus pilobryi</i> 2648-2672	115 (200%)
# 2630-2698	<i>Etheostoma caeruleum</i> ?	29 (90%)
# 2680-82; 2714	<i>Etheostoma punctulatum</i> *	5 (100%)
	<i>Noturus exilis</i> *	1
2621-21; 2722-81	<i>Phoxinus erythrogaster</i>	772 (200%)
# 2617-2620	<i>Cottus caroliniae</i>	27 (90%)
# 2611-15	<i>Semotilus atromaculatus</i>	20 (50%)
T# 2616	<i>Nocomis biguttatus</i>	1 (20%)

other:  
 many rocks covered in liverworts!  
 horseshair worms  
 crayfish 23  
 frogs

\* All species #'s on the previous page are for specimens caught <sup>both</sup> in the pool & the stream.

1 *Noturus exilis*  
 4 *Etheostoma punctulatum*  
 from small "stream" ~~added into pool~~

\* geomorphologist said that both are almost entirely groundwater (spring) fed - at least now that it is so dry

\* beautiful area!  
 \* the drive into the site was pretty nerve wracking (not an easily accessible site)  
 drove past "the guy that lives in a hole," and  
 "the family that lives in a bus under the collapsed hillside"  
 CULTURAL EXPERIENCE

# Bound vs. unbound

- Unbound

- Scanner – preferably document feeder
- Camera – light box, copy stand
- Color

- Bound

- More problematic
- Scan or photograph – not ideal unless item can be opened flat
- Book scanner – expensive and not readily available
- Professional company – Scan America

# Specimen Imaging

- Most ichthyology material better taken wet – either in water or preservative – to prevent desiccation and improve image quality – morphology rendered in higher quality
- Vast variety of sizes from larval to sharks and rays
- Cleared and stained and skeletal material
- Cost per unit effort – available resources – increases with increasing complexity – 2D field image, 2D high quality image with post processing, 3D image, MRI

## Problems:

- Shadow
- Uneven lighting
- Glare

# MK Digital Direct Light Box

<http://www.mkdigitaldirect.com>

Photo e-Box

Internal platform size – 32 inches x 20 inches

# Features

- 

# Wet boxes

KU 22705

# Ichthyology

## Priorities

- Type material \*
- Tissue vouchers
- Rare/threatened/endangered
- Sp. material for identification
- As accumulated or requested – internal and external

In the field...

E473

T 8480

T 8485

T 8545

# Utility of Images

- Confirm or make identification
- Morphological examination – landmarking (3D)
- Color morphs\*
- Field guides
- Publication
- Other external user groups – K-12, artists, publishers
- 3D, MRI – landmarks, internal structure

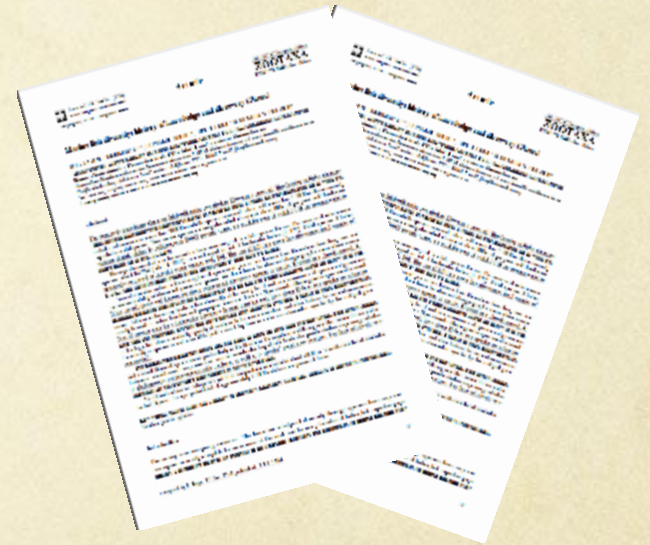

# Utility of Field Notes

- Confirm collection information – dates, times, locality, collectors etc.
- Augment collection information
- Additional information – associated species, environmental parameters, specimens collected but not kept etc.
- Travelogue
- **Next step - Transcription – e.g. Notes from Nature**
  - Higher value and integration of data

# Other augmented data

- Genbank sequences
  - Reuse of non-renewable resource
  - Metric of collection use
  - CO1 on BCoL and BOLD
- Publications and citations
  - Metric of collection use
  - Repeatable science
  - Copyright infringement?
- Video and audio – behavioral information, environment, interspecies interactions

# Infrastructure & Management

- Database able to handle digital content – attachments able to accommodate all kinds of media – images, video, audio, PDFs etc.
- Server infrastructure able to handle volume of material – space requirements
- Ability to serve this content up to the outside world – local portal and webpage, aggregators, research users, other users

# Access to data

- Final step to provide access to all data
- IPT portal and publishing through aggregator(s)
  - Vertnet, GBIF, iDigBio, Fishnet2
  - The more the merrier...
- Database web portal
- Data cleanliness – controlled vocabularies
- Exposing data to research community
- Provides assistance with data cleanup and ID
- Large and diverse external user community – big data
- Increase in use (loan traffic) and advocacy for collection

# Other developments

- iDigBio
- SPNHC – best practices wiki
- Biodiversity Collections Network (BCON)
- Prezi - <https://prezi.com/h9l4jfwexwsc/bcon-diagram/>
- ASIH – Collection Committee and best practices
- TCN...
