

Collections for the 21st Century, a Symposium

NATURAL SCIENCE COLLECTIONS ALLIANCE

The Natural Science Collections Alliance is a Washington, D.C.-based nonprofit association that supports natural science collections, their human resources, the institutions that house them, and their research activities for the benefit of science and society.

Robert Gropp, Director Public Policy Office

Advancing Digitization of Biodiversity Collections (ADBC)

**Coordinating center for the
national effort to digitize
natural history collections**

University of Florida

Larry Page: Project Director

Pam Soltis: Research opportunities

Bruce MacFadden: Educational activities

Jose Fortes: Cyberinfrastructure

Florida State University

Greg Riccardi: Digitization activities

Biodiversity Collections

The single largest source of information on biological diversity.

1,500 natural history collections in U.S.A.

**1 billion specimens
in USA**

**3 billion specimens
globally**

Advancing Digitization of Biodiversity Collections

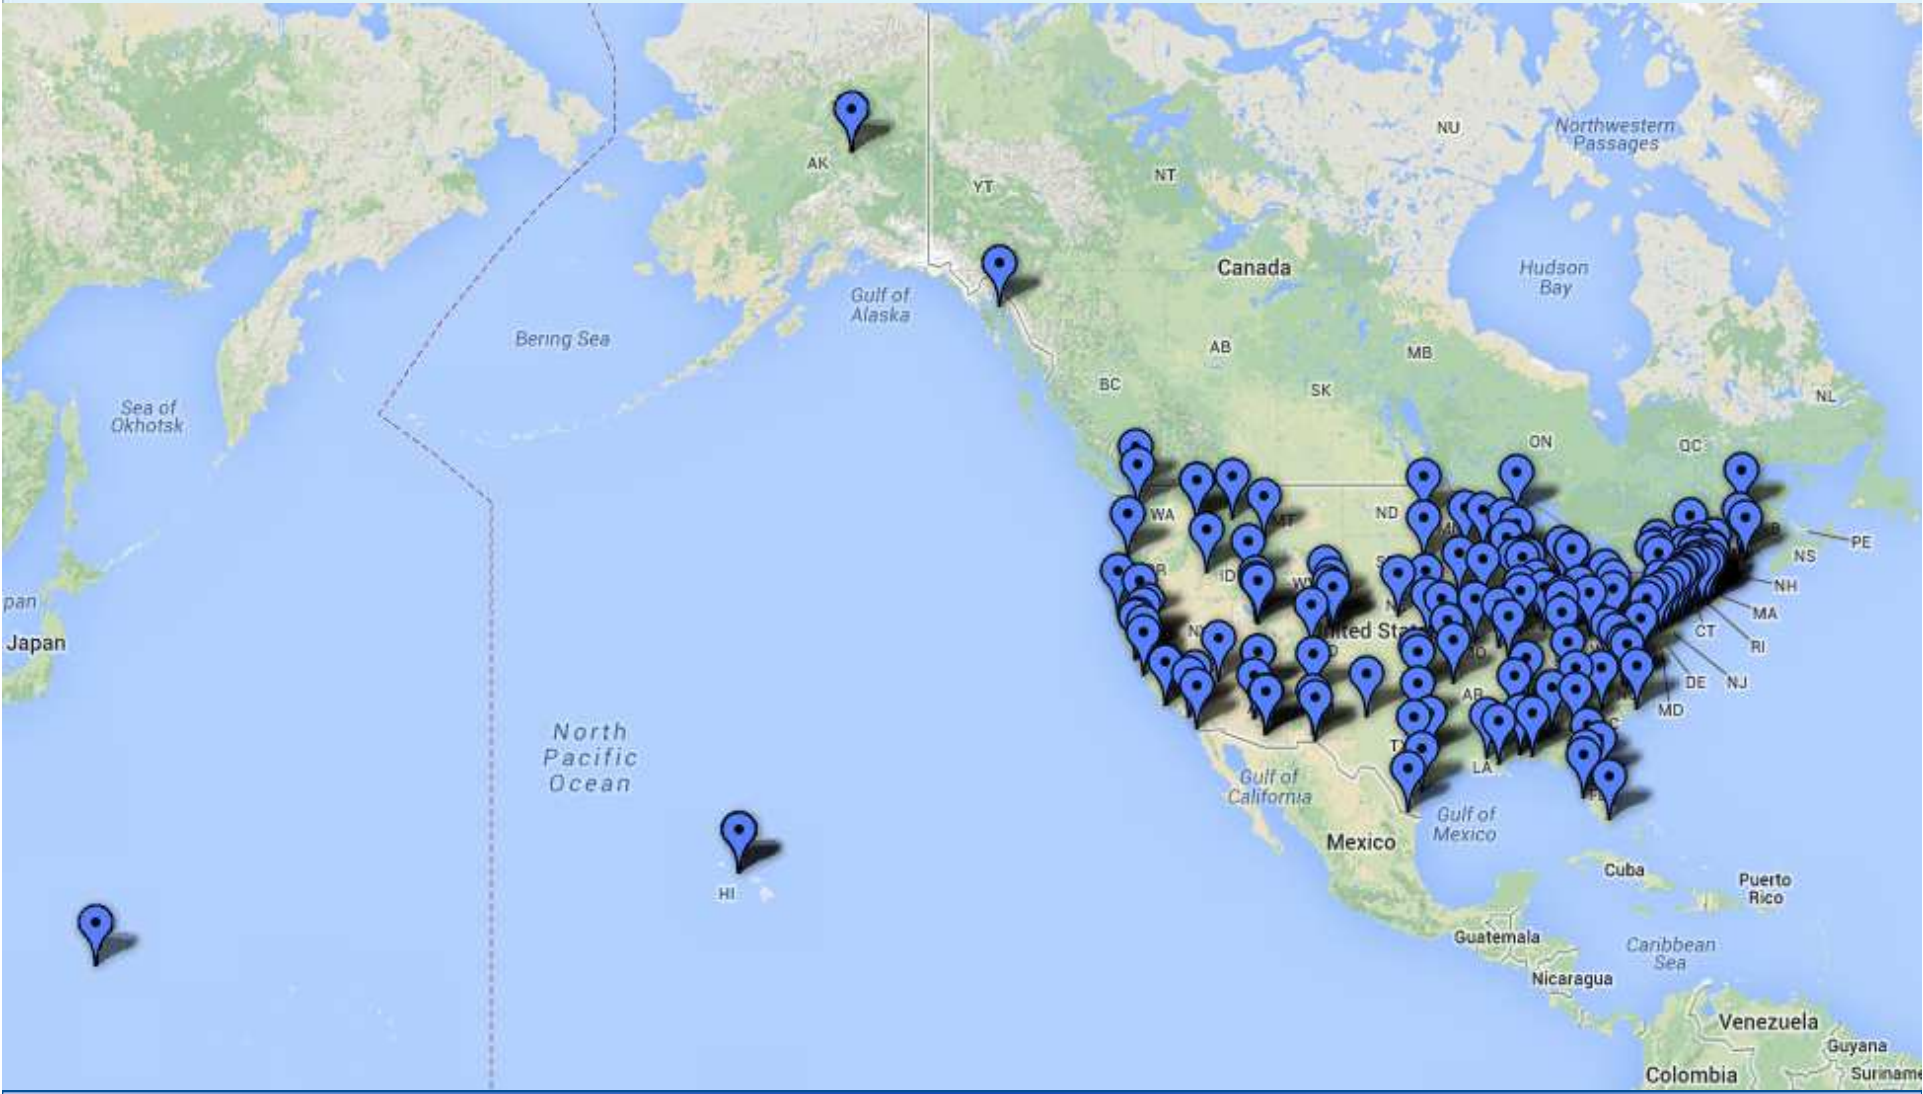

- Facilitate use of biodiversity collections data to address environmental and economic challenges
 - Researchers
 - Educators
 - General public, citizen scientists
 - Policy-makers

National Resource for Advancing
Digitization of Biological Collections

NATIONAL HUB, THEMATIC COLLECTION NETWORKS, AND COLLABORATORS

Ten TCNS and collaborating institutions: 152 institutions in 50 states

New Research and Educational Opportunities

- One billion records – huge source of biodiversity data
- Opportunities for previously intractable large-scale research requiring large amounts of spatial and temporal data

Big-science questions related to human health, climate change, agriculture, species discovery, species extinctions, rates of evolutionary change, and ecosystem services

Collections for the 21st Century, a Symposium

- **What collections data are available or could be made available?**
- **What research questions can we address?**
- **Have we demonstrated the power of collections data to answer big-science questions?**
- **How can the data improve our educational and outreach activities?**
- **How do we translate our accomplishments into more public and private support for our collections?**
