# iDigBio Search Portal

Changes / Improvements to the iDigBio Portal

What is the iDigBio Portal?

- AKA
  - iDigBio Search
  - Advanced Search
  - Specimen Portal

- It is
  - Search (and advanced search)
  - Collections, specimens, record set pages
  - The project data (not data about the project*)
  - Most "green bar" pages, under the research banner at www.idigbio.org/portal

Selected iDigBio improvements

- Search Improvements: Finding and linking to [associated sequences](#) and datasetIDs

- Map Improvements: Colors, bin boxes, zooming, sleeping

- Display Improvements: Labels, Media Compatibility, Media Linking and Media Not Found

- Code improvements: updates for security and compatibility

- Reporting: Data Usage statistics, portal website statistics, NSF Survey results

iDigBio Portal feature examination
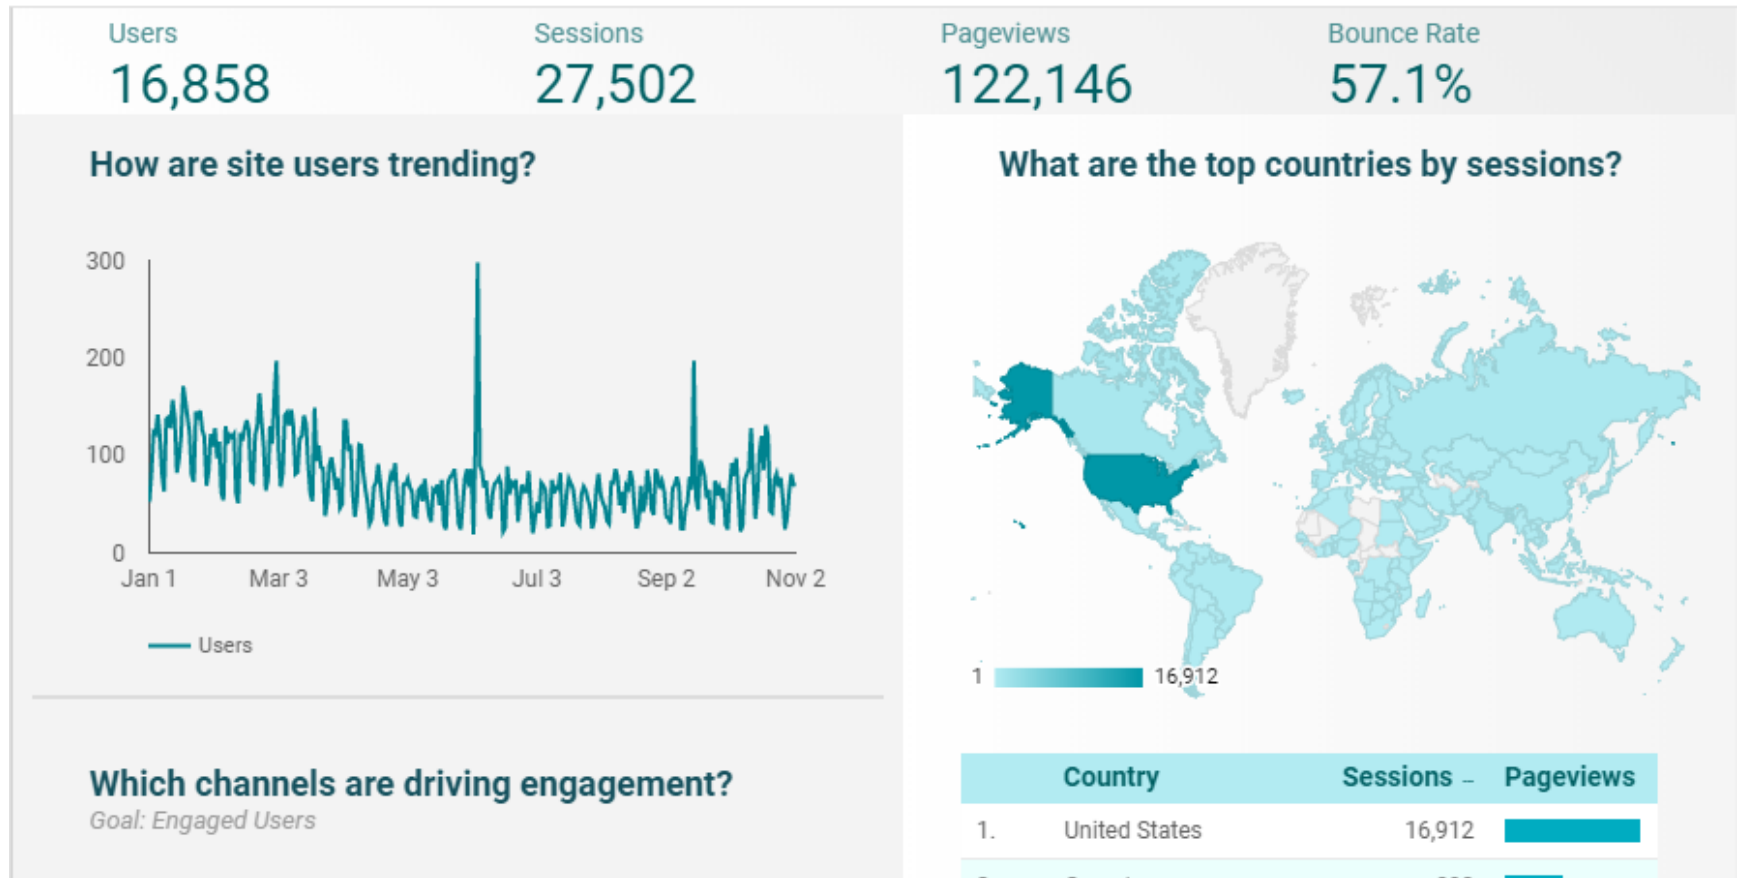

- Live demo of website features
